MAPLE

ADMIRER FOR CONSISTENCY

Maple's dense, smooth grain patterns and uniform coloring allow it to take lighter stain colors well. The occasional dark mineral streak and mild color variations add to Maple's character.

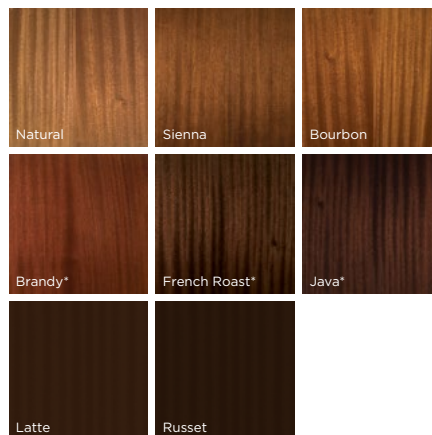

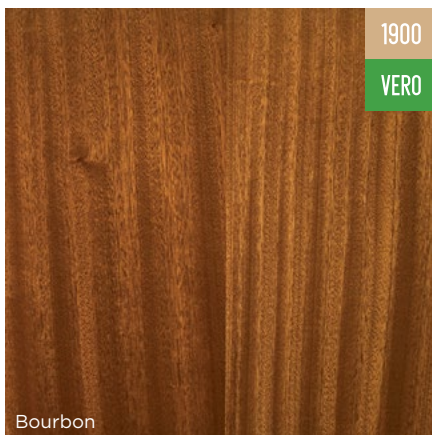

WALNUT

SYNONYMOUS WITH FINE WOODWORKING

Black American Walnut grows in the eastern states. This rich dark brown wood has an attractive grain pattern and is prized for its warmth and strength. Walnut will lighten with age and light exposure.

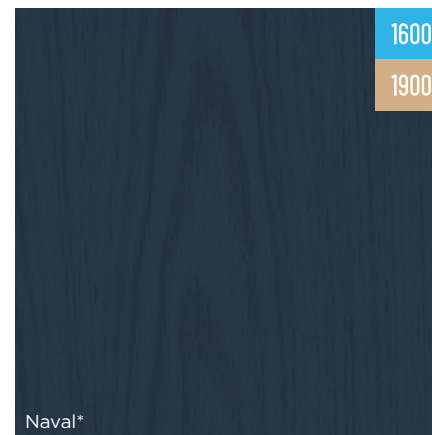

SAPELE

RIBBON GRAIN PATTERN

A member of the Mahogany family, Sapele is native to central Africa. This dense, strong wood, easily recognized by the well-defined ribbon grain pattern, is golden brown in color and will darken with age.

SOLID COLOR STAIN

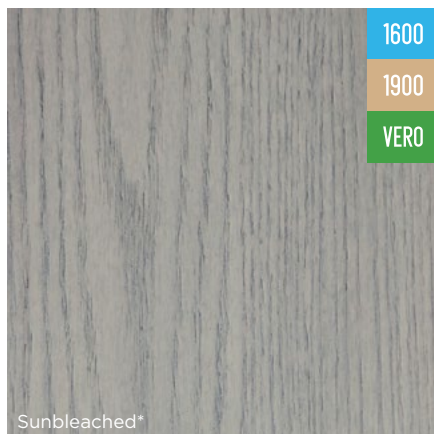

COLOR + TEXTURE

Slightly opaque, these heavily pigmented stains coat the material's surface in color and allow the open wood grain to show through. The result is a paint-like finish with a textured surface.
